

Requirement Review Notes

Project

Learning Management System (LMS)

Reviewer

QA Engineer

Review Date

DD-MM-YYYY

Requirement Review Summary

The LMS requirements were reviewed from a testing perspective to identify ambiguities, missing information, risks, dependencies, and testability concerns.

Review Observations**R1 - Student Registration****Observation**

Password policy is not specified.

Risk

Different developers may implement different password rules.

Recommendation

Define minimum password length, complexity requirements, and allowed special characters.

R2 - Student Login

Observation

Account lockout behavior is not specified.

Risk

Potential security vulnerability due to unlimited login attempts.

Recommendation

Specify maximum failed login attempts and lock duration.

R3 - Forgot Password**Observation**

Password reset link expiration time is not mentioned.

Risk

Expired links may remain valid indefinitely.

Recommendation

Define reset link validity period (e.g., 30 minutes).

R4 - Course Search**Observation**

Search behavior for partial keywords is unclear.

Risk

Inconsistent search results.

Recommendation

Specify support for partial match, exact match, and case sensitivity.

R5 - Course Enrollment

Observation

Duplicate enrollment behavior is not defined.

Risk

Students may enroll multiple times in the same course.

Recommendation

Allow only one active enrollment per course.

R6 - Course Dashboard**Observation**

Dashboard refresh frequency is not defined.

Risk

Students may see outdated information.

Recommendation

Specify when dashboard data should update.

R7 - Course Progress Tracking**Observation**

Progress calculation logic is not defined.

Risk

Incorrect completion percentages.

Recommendation

Define calculation formula for course completion.

R8 - Certificate Download

Observation

Certificate eligibility criteria are not specified.

Risk

Certificates may be generated before course completion.

Recommendation

Allow certificate generation only after 100% completion.

R9 - Instructor Course Creation**Observation**

Course approval workflow is not mentioned.

Risk

Unreviewed content may become publicly available.

Recommendation

Define approval process before publishing.

R10 - Admin User Management**Observation**

The impact of user deactivation is unclear.

Risk

Unexpected access behavior.

Recommendation

Specify whether deactivated users retain historical records and whether reactivation is supported.

Dependencies Identified

Requirement	Depends On
R2 Login	R1 Registration
R3 Forgot Password	R1 Registration
R5 Enrollment	R2 Login
R6 Dashboard	R5 Enrollment
R7 Progress Tracking	R5 Enrollment
R8 Certificate Download	R7 Progress Tracking

Testability Assessment

Requirement	Testable	Remarks
R1	Yes	Password rules required
R2	Yes	Lockout rules required
R3	Yes	Expiration rules required
R4	Yes	Search logic required
R5	Yes	Enrollment rules required
R6	Yes	Refresh behavior required
R7	Yes	Progress formula required
R8	Yes	Eligibility rules required
R9	Yes	Approval workflow required
R10	Yes	Deactivation rules required

Conclusion

The requirements are generally testable; however, several business rules require clarification before test case design begins. All identified observations have been raised through the Requirement Clarification Log for stakeholder review.
