

QA vs QC comparison

Quality Analysis	Quality control
Process oriented	Product oriented
Prevent defects	Find defects
Focus on improving processes	Focus on testing products

Verification vs Validation comparison

Verification	Validation
Checks whether the product is built correctly	Checks whether the right product is built
Prevent defects early	Find defects in products
Eg: Requirement review, Test case review	Eg: Functional Testing, Regression Testing

Food Delivery App examples

Verification	Validation
Review requirements for food ordering functionality	Verify user can order food at available restaurants
Review test case for order cancellation	Verify user can add food items to cart
Review requirement of COD payment	Verify use can place an order successfully
