

LMS Test Scenarios

Scenario ID	Requirement ID	Module	Test Scenario
TS001	R1	Registration	Verify student registration with valid details
TS002	R1	Registration	Verify mandatory field validations during registration
TS003	R1	Registration	Verify email uniqueness during registration
TS004	R1	Registration	Verify password policy validation
TS005	R2	Login	Verify login with valid credentials
TS006	R2	Login	Verify login with invalid credentials
TS007	R2	Login	Verify account lock after multiple failed login attempts
TS008	R3	Forgot Password	Verify forgot password link functionality
TS009	R3	Forgot Password	Verify password reset using valid reset link
TS010	R3	Forgot Password	Verify password reset link expiration
TS011	R4	Course Search	Verify search using valid course keyword
TS012	R4	Course Search	Verify search using partial keyword
TS013	R4	Course Search	Verify search with non-existing keyword
TS014	R5	Course Enrollment	Verify successful course enrollment
TS015	R5	Course Enrollment	Verify duplicate enrollment prevention
TS016	R5	Course Enrollment	Verify enrollment for unavailable courses

TS017	R6	Dashboard	Verify enrolled courses displayed on dashboard
TS018	R6	Dashboard	Verify dashboard data accuracy
TS019	R7	Progress Tracking	Verify course progress updates correctly
TS020	R7	Progress Tracking	Verify progress percentage calculation
TS021	R8	Certificate Download	Verify certificate generation after course completion
TS022	R8	Certificate Download	Verify certificate download functionality
TS023	R8	Certificate Download	Verify certificate access before completion is restricted
TS024	R9	Course Creation	Verify instructor can create course successfully
TS025	R9	Course Creation	Verify mandatory field validations during course creation
TS026	R9	Course Creation	Verify instructor can publish course
TS027	R10	User Management	Verify admin can view user list
TS028	R10	User Management	Verify admin can deactivate users
TS029	R10	User Management	Verify deactivated user cannot access LMS
TS030	R10	User Management	Verify admin can reactivate users
